

**Exercise 2.1** Shutdown VS. Halt VS. Reboot

NOTE: This exercise requires that it be run from the console (i.e., not over the network through SSH).

1. Reboot the system using **shutdown**.
2. Power off the system using **shutdown**.
3. Power the system back up.

Solution 2.1

1. `$ sudo shutdown -r now`
2. `$ sudo shutdown -h now`
3. Press the power button, or restart your virtual machine.
