Exercise 5.2: Make OpenSSH client config changes

Change the default username and create a host alias using `$HOME/.ssh/config`.

Solution 5.2

1. Edit the file `$HOME/.ssh/config` with the following contents:

```
host garply
  hostname localhost
  user root

host *
  ForwardX11 yes
```

2. Use the OpenSSH client to connect to the new alias:

```
$ ssh garply
$ hostname
$ id
$ exit
```
