Exercise 2.4: Starting a system service with systemd

Start the **vsftpd** daemon using **systemctl**, and verify that it is running

Solution 2.4

1. Start the daemon

   ```
   # systemctl start  vsftpd.service
   ```

2. Verify it is running

   ```
   # ps -ef | grep vsftpd
   or
   # systemctl status vsftpd.service
   ```

3. Use the service

   ```
   $ ftp localhost
   ```

4. Stop the daemon

   ```
   # systemctl stop vsftpd.service
   ```
